3.2.S.1.3 General Properties

This is a template for eCTD Section 3.2.S.1.3 (General Properties) documents to be used with Microsoft® Word 2003.

For the styles available in this template please refer to the user guide provided with this set of templates.

Entries in headers and footers are to be adjusted to the appropriate values.

Sample headlines and text parts are provided below to assist users in choosing the appropriate settings and to assign styles and formats to their own texts by copy and paste. Please make sure to remove the samples from the document, as soon as they're obsolete.

Please make also sure to update all entries in the documents Table of Contents, Tables of Tables and Table of Figures as well as automated cross-references by pressing "Ctrl. A" followed by "F9" before saving the file.

This blue part of the document contains information for the author only and has to be deleted before finalization of the document.

NtA-V2B-comments:

A list should be provided of physicochemical and other relevant properties of the drug substance, including biological activity for Biotech.

Reference CPMP-Guidelines: "Chemistry of the New Active Substance" and "Chemistry of Active Substance"

Reference CPMP-ICH Guidelines: "Specifications – Test Procedures and Acceptance Criteria for New Drug Substances and New Drug Products – Chemical Substances" and "Specifications – Test Procedures and Acceptance criteria for Biotechnological, Biological products"

3.2.S.1.3 General Properties

A list should be provided of physicochemical and other relevant properties of the drug substance, including biological activity for Biotech. Reference ICH Guidelines: Q6A and Q6B

Following is a sample list of some topics to consider in this section (obviously dependent on product nature):

1. Appearance

Appearance : (color, physical form): **Off-white yellow powder**

2. Properties

Property	Value / Result
Melting range	30 –31-deg C
Solution pH	6.3 – 6.4
Optical rotation	(example)
Organic solubility (synthesis solvents)	(example)
Aqueous solubility	(example)
Partition coefficient	(example)
Dissociation constants	(example)
Solid-state forms (polymorphs, solvates, hydrates)	(example)

Table 1: This is an Example for a table.
