1. Description and Composition of the Drug Product [Wonderpill, 5mg Tablets]

Information from 3.2.P.1 of Module 3 should be provided. Composition from 3.2.P.1 of Module 3 should be imported directly.

2. Pharmaceutical Development [Wonderpill, 5mg Tablets]

A discussion of the information and data from 3.2.P.2 of Module 3 should be presented. A tabulated summary of the composition of the formulations used in clinical trials and a presentation of dissolution profiles should be imported directly, where relevant.

3. Manufacture [Wonderpill, 5mg Tablets]

Information from 3.2.P.3 of Module 3 should include· Information on the manufacturer · A brief description of the manufacturing process and the controls that are intended to result in the routine and consistent production of a product of appropriate quality · A flow diagram, as provided under 3.2.P.3.3, should be imported directly · A brief description of the process validation and/or evaluation, as described in 3.2.P.3.5 of Module 3

4. Control of Excipients [Wonderpill, 5mg Tablets]

A brief summary of the quality of excipients, as described in 3.2.P.4 of Module 3, should be included.

5. Control of Drug Product [Wonderpill, 5mg Tablets]

A brief summary of the justification of the specifications, a summary of the analytical procedures and validation, and characterization of impurities should be provided.

Specifications from 3.2.P.5.1 of Module 3 should be imported directly.

A tabulated summary of the batch analyses provided under 3.2.P.5.4 of Module 3, with graphic representation where appropriate, should be imported directly.

6. Reference Standards or Materials [Wonderpill, 5mg Tablets]

Information from 3.2.P.6 of Module 3 (tabulated presentation where appropriate) should be included.

7. Container Closure System [Wonderpill, 5mg Tablets]

A brief description and discussion of the information in 3.2.P.7 of Module 3 should be included.

8. Stability [Wonderpill, 5mg Tablets]

A summary of the studies undertaken (conditions, batches, analytical procedures) and a brief discussion of the results and conclusions of the stability studies and analysis of data should be included. Conclusions regarding storage conditions and shelf life and, if applicable, in- use storage conditions and shelf life should be given.

A tabulated summary of the stability results from 3.2.P.8.3, with graphic representation where appropriate, should be imported directly.

The postapproval stability protocol, as described in 3.2.P.8.2, should be provided.

Note: A separate section 2.3.P should be provided for each dosage form. For example, for a second dosage form, the sections would be labeled 2.3.P [name, dosage form 2].
